

# Weiss Coating System

## The Rustic Series

The look of natural cedar combined with the durability and low maintenance of fiber cement siding. Unlike semi-transparent stained fiber cement products, our patented, two coat, baked on, latex finish system is designed for performance on fiber cement siding. Don't be fooled by look a like products! The Weiss Rustic series utilizes latex paint which is the only coating recommended by the major fiber cement manufacturers.

-  Better grain definition, real cedar appearance.
-  Oven cured coating system durability.
-  High quality acrylic latex paint, long term coating performance

ProTech packaging system, easier installation.
